PROFESSIONAL SUMMARY

BCA student and full stack developer specializing in the MERN stack with experience in building responsive web applications and RESTful APIs. Skilled in JavaScript, React, Node.js, and Python frameworks such as Flask and FastAPI, with hands-on experience integrating AI APIs into real-world projects. Solved 100+ problems on LeetCode, demonstrating strong problem-solving skills and understanding of data structures.

PROJECTS

- AI Nutrition Analyzer** | *React, Node.js, Express.js, MongoDB, REST APIs* Dec 2025 — April 2026
- Engineered an AI-powered platform that detects food via image upload and barcode scanning to generate real-time nutritional insights
 - Developed a personalized recommendation system that adapts dietary suggestions based on user data and fitness objectives
 - Implemented modular backend architecture (MCP) to ensure scalability, maintainability, and clean code separation
 - Integrated external nutrition APIs and built logic for meal scoring, health insights, and food substitution suggestions
 - Designed analytics dashboards for tracking calorie intake, macronutrient balance, and user progress trends
- TaskFlow** | *MongoDB, Express.js, React.js, Node.js* Nov 2025 – Jan 2026
- Built a scalable ToDo application using MongoDB, Express.js, React.js, Node.js
 - Developed RESTful APIs with JWT authentication and role-based authorization (User/Admin)
 - Implemented bcrypt hashing, validation, and rate limiting for security
 - Added pagination, search, and filtering to handle large datasets efficiently
 - Designed responsive UI with React and integrated APIs
 - Implemented centralized error handling and tested APIs using Postman
- AI Hallucination Detector** | *JavaScript, React, Gemini API* Dec 2025 – Dec 2025
- Built a web application to analyze AI-generated content and evaluate its reliability using AI-based reasoning
 - Integrated Google Gemini API to generate confidence scores categorized as High, Moderate, or Low reliability
 - Designed a scoring system with percentage-based trust levels and visual badges for better interpretation
 - Implemented history tracking to store and review previously analyzed content
 - Developed an interactive UI for structured feedback with explanations

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (Postgres), MongoDB, JavaScript, HTML/CSS
Frameworks: React, Node.js, Flask, WordPress, Material-UI, FastAPI
Developer Tools: Git, Docker, Google Cloud Platform, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse
Libraries: pandas, NumPy, Matplotlib

EDUCATION

Shree Ramswaroop Memorial University <i>Bachelors of Computer Application(BCA)—CGPA:8.41</i>	Lucknow, U.P <i>Aug. 2024 – Present</i>
Swarnim Public School <i>CBSE Higher Secondary Certificate</i>	Lucknow, U.P <i>Aug 2024</i>
